

Project: LaFarge
Locations: Alpharetta, GA
Project Type: Aggregate & Concrete Company
Project Mgr: Charlie Haun
Square Ft: 65,000

SCOPE

Build-to-Suit/Design/Construction/FF&E/Relocation

OPPORTUNITY

Due to Landmark Dodge's growth in their service area, their existing dealership was becoming outdated and cramped. Their primary focus was relocating to a new office location and dealership site in the same geographical area with minimal, if any, impact on their business or customer base.

SOLUTION

Honour provided full-service project management, including construction management, from project development through oversight of the relocation and move-in. Managing this client's build-to-suit project, Honour Project Management functioned as the single point-of-contact to Landmark Dodge for all project management assignments. Honour developed a complex communication plan, funneling all written and verbal communication from Corporate Dodge Chrysler management, local Landmark management, Architects, Engineers, Contractor, Subs and Suppliers through Honour as the **Single Point of Accountability**.

RESULT

Honour's project management efforts exceeded the client's needs, trimming time in their overall construction schedule and saving 15% in their FF&E budget by utilizing our strategic procurement relationships. Honour managed the relocation during off hours for the dealership to allow for no downtime or disruption to their business.
